Reflection on Technology Research

Reflect on the learning achieved through these exhibits. Include insights, awareness gained strengths, and areas for continued growth and development.

Learning on the use of technology in school counseling and the subsequent exposure to related exhibits has an intricate role in developing best practices in student handling. Markedly, the learning and exhibits focus on the best practices in providing instructions to students across a wide variety of educational functions. The learnings focus on the importance of technology in school counseling, especially in improving student treatment and behavior management efficacy. The exhibits increase awareness of the need for increased instructor engagement with technology across a wide range of school aspects related to student well-being. Such perspectives help apply practices in the use of technology and the guidelines under the exhibits to promote student welfare in modern learning. The exhibits also reinforce the role of instruction in proper student engagement, especially in the use of technology for different functions, such as school counseling.

How do these exhibits demonstrate development and competence in the above-listed standards and guidelines? Include the context in which it was developed (course or experience), your specific role if it was developed in cooperation with others, and feedback received.

The exhibit demonstrates the development and competence in the use of technology in instructor guidance in schools. It is worth noting that the modern education environment involves

a wide use of technology by teachers and students to promote student-centered learning. The exhibits regarding the use of technology in student counseling reveal that the standards and guidelines accommodate improvements in addressing student issues. The exhibits also promote instructor professionalism and engagement with students. In the context of technology use in school counseling, instructor professionalism and regulation of conduct allows for adept use of technology to cater to students' needs. Markedly, specific roles in developing appropriate and efficient standards and guidelines and encouraging competence in technology usage guide school counseling. It reiterates the role of instructors in managing parental, school, and student interests using technology to provide adept guidance to students.
